	5/17/13	HSP	35.74	32.8 200 day 32.43 31.93	35.47 34.82 33.97	Downtrend 36.39	Nice downtrend line since Sep 2011 with perfect top touches all the way thru 2013. Another confirm touch should be in the 36.39 area. This touch could confirm another rejection. RSI is overbought DMI+ is at the peak of its run according to this chart. MCD is almost at the peak of its run too. Short term support 33.97 if this does not hold then the below will come into play. I feel that short term above will not hold only because previously when over the stock is above 70 RSI it can fall back to around 40 RSI. Watch 36.88 super resistance. 20 day ma - 1st support 200 day ma - 2nd Support Target is the first short uptrend line 2nd and much stronger support/target the longer uptrend line Bounced on the 20 day 5/29
